

VALENTIN DYRDA

SOFTWARE DEVELOPER

Finland | +358 46 5798609 | dy97va@gmail.com | <https://github.com/dy97va>

Software Developer dedicated to learning and fueled by curiosity. Eager to join a dynamic team of professionals where knowledge is shared, and learning is encouraged.

EXPERIENCE

Nordcraft

Nordcraft Online Store

Implemented a fully functional online store platform where I can potentially sell leather goods that I make as part of my hobby. Tools i used in this project: React, TypeScript, CSS for frontend, Firebase for backend services (data storage and authentication) Stripe for secure payment processing, NodeJS for server-side payment processing logic, Git/GitHub for version control.

KAO

Laundry reservation management system

Developed a web-based reservations management system for student housing, making the process of booking laundry facilities easier. Tools and technologies i used in this project: React.js for frontend development, CSS for styling, Firebase for backend services (data storing and authentication), Git/GitHub for version control.

The Monty Hall App

Monty Hall problem demo for IOS

Engineered an iOS application that gamifies the Monty Hall Problem, a renowned probability puzzle, offering an engaging user experience. Tools I used in this project: Swift for application development, UIKit for building the user interface, Core Data for data

EDUCATION

Kajaanin ammattikorkeakoulu

Degree in software engineering

SKILLS

Web development: React, TypeScript, CSS, Zustand, NodeJS

Mobile Development: Swift, React Native, CloudKit, SwiftUI, UIKit

System Development: C/C++

Others: Python, GitLab CI/CD, Firebase, MongoDB, Stripe, Git/GitHub, Docker
